

JCOIN2.0 Client CDE REDCap Project

Track Changes and Updates

Date of new CSV file release	CSV filename / Version	Changes and updates	Implementation instructions
5/20/26	Version 1 MAARCJCOIN20ClientCDEs_DataDictionary_2026-05-26	N/A	N/A
6/3/26	Version 2 MAARCJCOIN20ClientCDEs_DataDictionary_2026-06-02	- Item D7 re: work/school arrangements: We neglected to include a field that captures a person's disability if they select the "Too disabled for work" response option. The revised project includes this field. - Item D11 re: transportation is an OPTIONAL item, but was not marked as OPTIONAL in the project. The field is marked as OPTIONAL in the revised project. - S2aa: The note in the field label should have read "Note: Skip if ALL of S1a - S1f are 'Never.'" This change is reflected in the revised project. - R2 matrix: There was a typo in the response options. The option "or more years ago" was changed to "One or more years ago" in the revised project.	- Item D7 re: work/school arrangements: To add this field: - Click Add field to create a new field - Select "Text Box" as the field type - The field label should read: "D7disability. Please describe disability." and label the variable name: "work_disability" - Click Save - Add branching logic by clicking on the green branching icon in the field. Type the following into the "Show the field ONLY if..." box: [work_school(13)]=1 - Click "Update and Close Editor" and then "Save" - Item D11 re: transportation: You may include or omit this field, depending on the needs of your study. - S2aa: The note in the field label should read "Note: Skip if ALL of S1a - S1f are 'Never.'" To add this note, click on the pencil icon in field S2aa and add the note to the field label. - R2 matrix: There is a typo in the response options. The option "or more years ago" needs to be changed to "One or more years ago." This can be done by clicking on the Edit pencil for the matrix, scrolling down to the Matrix Column Choices, and changing the response to "One or more years ago."
6/5/26	Version 3 MAARCJCOIN20ClientCDEs_DataDictionary_2026-06-05	- The branching logic for item U5d was modified from [detox_meds_add(6)]<>'1' to [detox_meds_yn]=1' and [detox_meds_add(6)]<>'1' - The embedded field variable name in J9 was specified incorrectly. It was changed from {specialty_type_other} to {specialty_court_other}	- To correct the branching logic: - Click on the green branch icon in the U5d field and change the logic to: [detox_meds_yn]=1' and [detox_meds_add(6)]<>'1'. Note that REDCap uses square brackets around variable names. - Update and Save the changes. If your project is already in Production mode, you will have to submit the changes.

		3. The field type for J14 was changed from Descriptive Text to Text Box. 4. We added additional validation for fields including “None” or “None of the above” response options that will prevent a user from entering both “none” and another response option: Fields affected: D5a, D8, J1, J1a, J6, J16, U1, U5b.	2. The embedded field variable name in J9 was specified incorrectly. It needs to be changed from {specialty_type_other} to {specialty_court_other} - Click on the pencil icon for J9 to edit the field. Scroll down to the “Choices” box and change the bracketed variable name as noted above. - Note that these are <i>curly</i> brackets to denote an embedded field. - If your project is already in Production mode, you will have to submit the changes. 3. The field type for J14 needs to be changed from Descriptive Text to Text Box. - Click on the pencil icon to edit J14. Select Text Box from the Field Type pull-down menu. Save changes. 4. To add this validation to fields that contain “None” or “None of the above”: - Click on the pencil icon for the field. Scroll down to the pink Action Tag/Field Annotation box and click inside it. - Type the following in the box: - D5a: @NONEOFTHEABOVE='1' - D8: @NONEOFTHEABOVE='1' - J1: @NONEOFTHEABOVE='0' - J1a: @NONEOFTHEABOVE='0' - J6: @NONEOFTHEABOVE='4' - J16: @NONEOFTHEABOVE='13' - U1: @NONEOFTHEABOVE='0' - U5b: @NONEOFTHEABOVE='6' - For each field, after making the addition, click Update and Close Editor, then Save.
7/10/26	Version 4 MAARCJCOIN20ClientCDEs_DataDictionary_ 2026-07-10.csv	1. Delete event-specific branching logic from fields D5, D5grade, and D5other, if capturing education at follow-up. 2. Add branching logic [insurance]<>'1' to field D8a. 3. Change S2f1 branching logic to: [overdose]='1' or [overdose]='2'.	1. Click on green branching icon in field and delete [event-id]='#####' logic. Save changes. 2. Click on green branching icon in field D8a and type [insurance]<>'1'. Save changes. 3. Click on green branching icon in field S2f1 and change branching logic to: [overdose]='1' or [overdose]='2'. Save changes.
